The Atlantic Richfield Company, Prudhoe Bay Oil Field
Application for PSD Permit

Michael M. Johnston, Acting Chief
Air Compliance Evaluation Section M/S 513

Robert Chivvis
Alaska Air Coordinator

Attached is a copy of Atlantic Richfield Company's PSD application
to install support equipment at the Prudhoe Bay Oil Field.

The Surveillance and Analysis Division (SAD) is presently reviewing
the application for completeness. Once a complete application is
received and identified as complete, SAD generates the preliminary
technical analysis which is the foundation for preliminary determina-
tion. Your comments are important in that you are more aware than
any of us in the Regional Office of issues, often non-technical in
nature, which may significantly affect the preliminary and final
determinations. In this regard, please review the application and
indicate to me any comments you may have.
